

JOSCAR Zero

Supplier Summary

What is JOSCAR Zero?

JOSCAR Zero is a collaborative decarbonisation platform which is committed to introducing decarbonisation practices that make it easier for you to do business with us. UK defence and aerospace buying organisations including Leonardo are using JOSCAR Zero to calculate their scope 1,2 & 3 carbon emission in support of the government's commitment to Net Zero.

Why is Leonardo Joining JOSCAR Zero?

Leonardo's decision to join JOSCAR Zero reflects a strategic focus on data-driven sustainability. Hellios will support the company to:

- Increase supplier engagement on Net Zero.
- Work with suppliers on Science Based Targets (SBTs) to support Leonardo's own Net Zero objectives in the UK.
- Provide suppliers with tailored carbon action plans.
- Improve accuracy in reporting supplier and corporate emissions.

For more information on JOSCAR Zero please contact:

ross.findlay@leonardo.com or freya.kerry@leonardo.com

We expect JOSCAR Zero to deliver several benefits to you

1. Prove you're working towards Net Zero

- A transparent process that provides guidance on the information needed to calculate your emissions.
- Receive tailored Carbon Reduction Plan's to make company changes and progress towards Net Zero, while being able to update year on year carbon reports.

2. Save time and money

- While JOSCAR Zero is a smaller questionnaire than JOSCAR it still follows the same principle, you submit your information once through the JOSCAR portal. No duplicates needed.

3. Clear next steps with tailored Carbon Action Plans

- Once complete on JOSCAR Zero, you can use your site level Carbon Action Plans to focus your efforts on the areas which will make the biggest difference to you and your customers, allowing us all to collaboratively reduce carbon emissions.
- You'll receive help and support from the team at Hellios Information, providing guidance throughout your JOSCAR Zero journey.

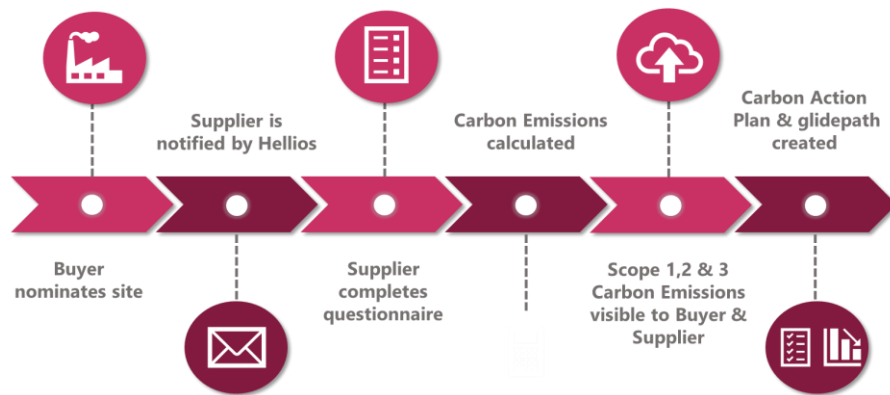

In summary, the process should provide an easier route to doing business with Leonardo in the future. This simple approach gives you a head start and competitive advantage while taking control of your decarbonisation information.

JOSCAR Zero

Supplier Summary

How it works

I've been invited to complete JOSCAR Zero, what do I need to do?

Our external partner Hellios Information will contact you with details on how to complete the JOSCAR Zero questionnaire. JOSCAR Zero is an additional process to JOSCAR and requests different information.

Frequently Asked Questions

Why have I been asked to join JOSCAR Zero, I am already on JOSCAR?

- JOSCAR is used as a tool for the Aerospace and Defence industry to store compliance information, helping determine if a supplier is “ready for business.”
- JOSCAR Zero is a separate tool with a smaller question set for accurate carbon reporting, providing you and your customer with the tools to reduce. Aerospace & Defence organisations are using JOSCAR Zero to reduce Scope 3 emissions, supporting Net Zero goals.

What is the role of Hellios Information?

- Hellios Information is a UK-based organisation. The team has extensive experience in the collection and maintenance of supplier data and so Leonardo has appointed Hellios Information to collect and process supplier data on our behalf.
- Hellios Information does not assess supplier suitability for compliance approval, this decision always remains with each of the buying organisations.

What areas does the questionnaire cover?

- You will be required to submit site level consumption data for Scopes 1 and 2, along with any Scope 3 categories you've calculated at the site level. On average, suppliers are typically required to respond to 30 questions.

Will my competitors have access to the information we provide?

- Other suppliers will not have access to the information you provide. It is only available to the buying organisations using JOSCAR Zero. Each buying organisation has signed confidentiality agreements with Hellios Information.
