FRONT END ENGINEER

Dublin, Ireland

Hellios is a supplier information and risk management company operating in the financial services, defence industry and retail sectors. The company was founded to benefit major blue-chip companies and their suppliers by providing a single streamlined approach by providing and sharing information across an industry community in areas including modern slavery, cyber security and GDPR.

Hellios has grown rapidly from a start-up in 2012 to having more than 50 employees and a turnover of more than £5m. The Company is continuing to grow quickly and a key part of this role is to prepare the Company for further growth.

Hellios Technology Solutions is our subsidiary based in Dublin, Ireland and responsible for software development throughout the Hellios Group.

The ethos of Hellios and each of our employees is to provide the highest quality service and technology based on long term sustainable relationships with our buyer and supplier customers. To find out more about Hellios and the core values that underpin the culture of our people, partners and the way we work with our customers please visit our website at <http://www.hellios.com>

Job Title: Front End Engineer

Location: Dublin, Ireland

Reporting to: Kevin Thomas

Job Summary: Hellios Systems are looking for a Front End Engineer to join our new technology/software engineering team in Dublin. You will be tasked with supporting & evolving our web-based supplier information & risk management systems. These systems underpin the Industry communities that rely on our highly accurate and compliant data services during their key supply chain/procurement management cycle. *Our current technology stack includes some of the following....* React, Typescript, ECMAScript 6, C#, .Net Core, Entity framework, Git, Azure DevOps, AWS, PostgreSQL, REST APIs and PHP

Closing Date: 31st May 2021

KEY RESPONSIBILITIES

- Create/Implement any new UI / Front end features or enhancements for Hellios web-based Supplier Management System.
- Embrace agile practices and follow modern principles to ensure high quality, clean, well-tested and extendable code.
- Contribute ideas to the improvement and continuous evolution of all IT and software for Hellios and their customers.
- Participate in daily scrum stand up with your peers to ensure a culture of transparency, collaboration, and inclusiveness.

KEY REQUIREMENTS

Knowledge and experience

- Experience creating/building modern UI/Web responsive applications.
- 5 years or more commercial software development experience, ideally within an Enterprise Software product environment.
- Good experience working with HTML(5) and CSS(3).
- Experience working with API / webservice is an advantage.
- Exposure to cloud platforms, AWS an advantage.

Qualifications and skills

- Bachelor's degree in Computer science, ICT or equivalent industry experience.
- Strong proficiency in Javascript and associated frameworks.
- Strong proficiency in React 18.8 over above and Typescript or Javascript ES6.
- Strong attention to detail and understand the importance of clean, clear, and maintainable code.
- Team player who appreciates strong communication and collaboration when working with peers
