

**Assurance Programme Solutions (APS) was founded in 2015. We believe consulting needs to be redefined to enable digital transformation. We are the catalyst Consultancy that enables technology-based change by collaborating closely with your people from ideation to implementation.**

We work within the Financial Services industry on change and transformation programmes and projects which include Cloud, Data, Security, IT and Business Transformation, Technical IT delivery and Programme Delivery, priding ourselves on delivering projects on time, on budget and with a quality expected in a rapidly changing landscape. Our vision is to become a trusted partner within the Industry who organisations can rely on to deliver. We work in partnership with our clients, providing them with the services they require at commercial terms demonstrating value for money.

It is important to APS that we provide our clients with tangible value by engaging our services, and we ensure that we leave our clients in a better place having engaged us, we do this by transferring knowledge and helping them become more self-sufficient. Our mission is to be the Consultancy of Choice as a digital pioneer focussed on the client and Redefining Consultancy Services as a sector catalyst with a trusted network of professionals.

**As part of onboarding into a new Client in 2021 APS were asked to join FSQS to support us with the onboarding as a new supplier, having previously onboarded into other clients over email and completion of many different forms. Working with Hellios/FSQS has been a much easier solution for our clients to ensure our company and data is up to date while working with APS on engagements.**

Additionally, the ease of completion of the questionnaire and updating on an annual basis, allows our clients to ensure our data is correct and up to date for our clients to see via the platform.

“FSQS has provided APS with a solution to support our compliance to work with our financial services clients that is up to date and access to new clients who can see our profile and our expertise to engage our services.”

**David Newland**  
Managing Director, Assurance  
Programme Solutions (APS)
