

Canon Business Centre SOS supply and support Canon print and scan hard-ware, from desktop and office multi-functional devices to entire print room fit outs.

We have FSQS clients throughout the UK and worldwide with the most secure, carbon neutral managed print solutions available. Whether that's photocopiers in London or Leeds to entire secure managed print installations in Swansea, Singapore, and Stuttgart.

As well as photocopiers, printers, multifunctional devices, scanners, and associated print management software, we also supply digital workflow tech, digital signature packages and for clients in the UK, a print and scan bureau.

The SOS team is dedicated to delivering outstanding customer service, and we work closely with our clients to understand their unique business needs. We become an integral part of our clients' operations, providing a workplace solution that meets their requirements, while also providing peace of mind to concentrate on other business challenges.

SOS are committed to shaping a secure digital future by bringing business and technology together. We continually look for new developments that could improve performance, such as personalised digital systems that enhance security compliance and reduce running costs by minimising waste. With a focus on sustainability, productivity, and affordability, SOS is a partner that financial services and insurance companies can rely on to help them achieve their compliance obligations and digital transformation objectives in the UK or overseas.

In 2020 SOS Systems Ltd were invited to join FSQS by one of the financial services buyers within the scheme. After careful consideration, SOS joined and have renewed every year since.

Hellios' validation team were particularly helpful during the initial registration process, which was surprisingly straight forward. It wasn't a particularly arduous process and once completed, we check and amend the data in the questionnaire annually. This gives us a reminder to ensure our data is up to date for all the buying organisation registered on FSQS.

FSQS has provided SOS with an independent audit of our working practices and a level of compliance and regulation to adhere to. This ensures the marketing communications we design and deliver for our financial services clients are robust, positioned effectively, and cognisant of regulations. FSQS has also provided us with the opportunity to talk to other financial institutions in the UK and globally.

"FSQS has provided SOS with an independent audit of our working practices and a level of compliance and regulation to adhere to. This ensures the marketing communications we design and deliver for our financial services clients are robust, positioned effectively, and cognisant of regulations."

Chris Sills

Managing Director, Canon Business Centre SOS (SOS Systems Ltd)
