

Morgans Consult are a specialist signage company with over 25 years of experience in designing, manufacturing, and installing a wide range of bespoke signage solutions. We have built a market leading team, who are experts in complex wayfinding system design, branding, brand interiors, innovative manufacturing, and installation.

Our headquarters is in Cardiff, South Wales, and our team have built an impressive portfolio of clients throughout the UK. Each of these has a reputation for delivering high quality work and exceptional customer service throughout the production process and beyond.

Morgans Consult, as part of the MS Group, has always recognised the importance of diversification to enable us to satisfy the ever-growing requirements of our progressive client base. We also use our network of sister companies offering additional specialist services. The scope of services and manufacturing capabilities far exceeds many of our competitors, leading to a period of significant growth, and a confidence in the future performance of the company.

We are ISO 9001 and ISO 14001 accredited, highlighting both our commitment to exceptional quality and protecting the environment. We recently launched our 'Plant a Green Future' scheme, which commits to planting trees on behalf of our clients.

For many years Morgans Consult have provided signage and printing products and creative services to the financial sector. Our high level of service to the industry resulted in our invitation to join the FSQS pre-approved supply chain. This series of stringent checks are assessed through the robust questionnaire process, which challenges our company's ability to meet the required standards. Once completed and upon acceptance to the scheme, it assures the network of financial buyers that we meet the compliance and regulation requirements of the industry.

The supplier portal is very intuitive and provides a clear step by step process that prompts you to complete the required sections. It also provides automated prompts when any documents or information require updating, following the initial approval. Phone support is always available and call reminders on approaching deadlines are particularly useful with a busy schedule.

The volume of information supplied for approval to the system allows potential buyers to streamline their procurement procedures and significantly reduces the resources required when being onboarded to a new customer, allowing us to focus on successful project delivery.

"Being a member of the FSQS community has helped us to ensure our clients receive a high-quality service that is fully compliant with the latest requirements of the industry. This enables us to strengthen our reputation as a leading supplier of print and signage products and services."

Michael Kitchin
