

Entelgy

Entelgy is an innovative Consulting, Outsourcing and Technology group with an international scope, a global transformation accelerator for those who need to remain competitive in a rapidly changing world.

Inspiring and contributing new solutions to the teams with which we co-create and work. Helping to adopt and operate the new technologies that drive their challenges, accompanying them in their change, and cyber-protecting their assets.

We work every day to meet tomorrow's opportunities at the speed we need today, creating a better future for all.

Present in 8 countries: Argentina, Brazil, Chile, Colombia, Spain, Mexico, Peru, and the USA, which allows us to give the same response to the same business challenge, in a global way.

The experience we have had registering as a supplier with FSQS-ES has been truly exceptional and highly appreciated, especially in this type of process that involves a significant amount of information.

From the beginning, we found a registration process that stood out for its clarity and ease of use. The intuitive interface effectively guided us through each step, presenting a well-organised structure and providing detailed explanations every step of the way.

Another feature that really made the difference is the exceptional help and treatment we received. Any concerns that arose were addressed promptly, demonstrating a high level of commitment from the entire Hellios team.

Our registration experience as providers on this platform has been more than positive. Beyond providing an efficient and easy-to-use platform, the level of professionalism and customer service we have experienced is excellent.

“Registering as a supplier with FSQS-ES has allowed us to demonstrate compliance with rigorous governance and regulation standards in the financial services sector, strengthening our reputation and business relationships.”

Enrique Santiago Muñoz
Director Financial Services en Entelgy
