

One-O-Five

P R E C I S I O N

One-O-Five Precision, is a precision CNC manufacturing company that takes pride in its quality of work and aims to build lasting relationships with both its employees, customers, and suppliers.

The company was founded by Richard Pratt in January 2021 and has grown to be an up-and-coming name in the Engineering Sector.

We currently work in Nuclear, Defence, Motorsport, and Oil & Gas. With the help of our JOSCAR and ISO 9001 certifications, we hope to increase our customer base in these areas.

Our vision is to become a leader of quality products and development of machining capabilities. One-O-Five can complete both one-off and batch works to a high standard in a short lead time, without adversely affecting the quality of our work.

With the belief that continual improvement, working safely and taking responsibility for our work #team105 comes together to bring a family feel to a growing business.

We ensure that we include every member of our team with the growth and development of both our technology, business, and personal goals for the future.

We value every customer, employee and supplier and aim to put employee satisfaction, customer service, quality and safety at the forefront of our business.

We heard about Hellios and JOSCAR at a local supplier event where we met Isobel Knight, a service delivery manager at Hellios. She kindly showed us the benefits of registration and gaining certification with JOSCAR. We have found that the information she provided us was backed up by the organisation and their entire team.

The process was simple and quick, we received our certificate shortly after completing the questionnaire which is now displayed on our website and LinkedIn for potential customers to see.

“JOSCAR/Hellios have provided One-O-Five Precision with an extra level of security for our customers.

Due to the validation process that is in place, our certification means we can be sure that our internal procedures are correct and fit for purpose and meet the requirements of our potential customers.”

Richard Pratt,
Managing Director, One-O-Five
